

Quality Assurance Unit Activities

2026/2027

The activities of the Quality Assurance Unit at the Faculty of Nursing include a set of practical procedures and actions carried out to fulfill the Unit's role and strategic objectives in developing and improving academic and administrative performance. The most prominent of these activities are as follows:

1-Promoting a Culture of Quality

The Unit works to strengthen the concept of quality and quality assurance within the Faculty by organizing workshops and awareness seminars, and by preparing informational bulletins and publications that highlight the importance of quality and its role in improving institutional performance. These activities target all groups within the Faculty, including faculty members, teaching assistants, administrative staff, and students

2-Assessing Stakeholder Feedback

The Unit conducts periodic surveys and interviews to collect and assess feedback from students, faculty members, administrative staff, and leadership regarding various aspects of the educational and administrative processes. The results are analyzed and utilized to enhance institutional performance and academic programs
