

Vision, mission and strategic goals of the Faculty of Nursing 2025-2026

Vision of the Faculty of Nursing

To achieve a leading position among nursing faculties locally, regionally, and internationally.

Mission of the Faculty of Nursing

The Faculty of Nursing, Benha University, is committed to preparing graduates capable of providing comprehensive nursing care with a high level of efficiency and excellence in the fields of education, scientific research, and community service. The faculty also supports sustainable development to advance the nursing profession locally and regionally, and to meet the needs of a competitive labor market.

Strategic Goals of the Faculty

The faculty seeks to achieve nine main goals as follows:

- Producing distinguished students and graduates capable of competition and innovation.
- Advancing postgraduate studies and enhancing the quality and ethics of scientific research.
- Gaining community trust.
- Addressing climate change and its impact on human health.
- Ensuring institutional performance quality, continuous development, and sustainable human resource development.
- Developing financial resources.
- Increasing the faculty's capacity.
- Enhancing the faculty's international standing.
- Utilizing information technology and supporting digital transformation within the faculty.
